## **ABSTRAK**

*Bandar udara Internasional Soekarno Hatta dan Bandar udara Halim perdana kusuma yang terletak di kawasan metropolitan Jabodetabek yang merupakan kawasan terbanyak pengguna transportasi udara di Indonesia.. Seiring dengan semakin meningkatnya pengguna moda transportasi udara diperlukan suatu sistem multi bandar udara untuk mengurangi beban disalah satu bandara.*

*Dalam Tugas akhir ini menggunakan metode analisis kualitatif dengan membandingkan sebuah data yang ada dengan data yang didapat dari penelitian untuk menentukan sebuah kriteria multi bandar udara.*

*Dari hasil pengolahan data didapatkan kesimpulan bahwa pengembangan sistem multi bandar udara di kawasan metropolitan Jabodetabek memiliki beberapa kriteria yaitu jarak bandar udara, aksesibilitas, manajemen pengelola bandar udara, layanan rute bandar udara, demand penumpang serta regulasi dan kebijakan pemerintah yang mengatur tentang sistem multi bandar udara.*

## **ABSTRACT**

*Soekarno Hatta International Airport and Halim Perdana Kusuma Airport are located in the Jabodetabek metropolitan area which is the largest area for air transportation users in Indonesia. Along with the increasing number of users of air transportation modes, a multi-airport system is needed to reduce the burden on one airport.*

*In this final project using a qualitative analysis method by comparing an existing data with data obtained from the study to determine a multi-airport criteria.*

*From the results of data processing, it is concluded that the development of a multi-airport system in the Jabodetabek metropolitan area has several criteria, namely airport distance, accessibility, airport management, airport route services, passenger demand as well as government regulations and policies governing the multi-airport systems.*
